OUTLOOK:

*** A RED FLAG WARNING IS POSTED IN SOUTHERN CALIFORNIA FOR LOW RELATIVE HUMIDITIES AND GUSTY NORTH WINDS. ***

A surface high pressure centered over the Great Basin will produce gusty Santa Ana winds up to 40 mph, with low relative humidities down to 8 percent. Maximum temperatures will be in the 90's to near 100 degrees around the inland areas of southern California. The high pressure system will continue to cause dry conditions over the west from central Oregon and Idaho southward. Maximum high temperatures will range from the 60's along the Pacific Coast to the 70's and lower 80's inland. A Pacific storm will remain along the Canadian border today spreading clouds and rain from the northern Oregon and Washington coasts into parts of the northern Intermountain Region.

A low pressure system in New Mexico will move slowly east through Texas and into the Gulf states. Scattered showers and thunderstorms will result from this system. Maximum high temperatures will range from the mid 70's to around 90 degrees. Minimum relative humidities will range from 55 to 70 percent.
